

# Asia

Asia is the biggest and the most populated continent, with 48 countries. It holds onto 3 different continent: Europe, Africa and Oceania.

## Mountains

Mount Everest is the biggest mountain in the world and it's 8,848 metres high. Mt Everest is at the bottom of China and the top of India.

**Everest** grows by about a quarter of an inch (0.25") every year.

There are at least 48 mountains in the Himalayas.

## Countries

### India

India has 1.353 billion people (2018).

The main mountain range in India is the Himalayas.

China is 3 times bigger than India.

The longest river in India is the river Ganges.

## Biggest rivers in Asia

- 1) The Yangtze, China

It starts in the Himalayas [just like the River Ganges] and flows into the South China Sea in Shanghai.

## 2) The yellow river, China

Starts in the west and flows across China.  
It finishes on the North-East coast of the country.
