

My 2.6 Challenge

As part of the 2.6 challenge. I decided to ride the marathon distance of 26.2 miles on my bike. I decided to support the Cavernoma Alliance charity because my Mum has a Cavernoma (a cavernoma is a cluster of abnormal blood vessels that can cause all sorts of neurological problems)

I did lots of training before my ride including running with my Dad 3 times a week and riding my bike every day. My Mum set up a just giving page and I asked my family and friends to sponsor me. My aim is £260.

On the 17th may we set off to do my 26 miles. My Mum road it with me. We set off from our house in Christchurch to Brockenhurst. Then we stopped to have lunch with my dad and my sister. Then we continued to ride to New Milton. Then to Highcliffe castle, through the nature reserve and back on the road to home.

The overall distance we cycled was 30.27 miles which we tracked on my mum's smart watch. It took us 3 and a 3 quarter hours cycling time.

I am very pleased to say that we raised £548 to date for the Cavernoma Alliance. It was worth the sore legs!!
