

The Sensational Sloth

By Frank

Sloths are very mild mannered animals and enjoy things to the max. They are chilled and are slow and steady like a tortoise. They take all of it in. These majestic, lethargic creatures live mainly in Central and South America.

Appearance

Sloths appearance is: A round head, a stubby tail, very sharp claws and tiny ears. They are very, very cute.

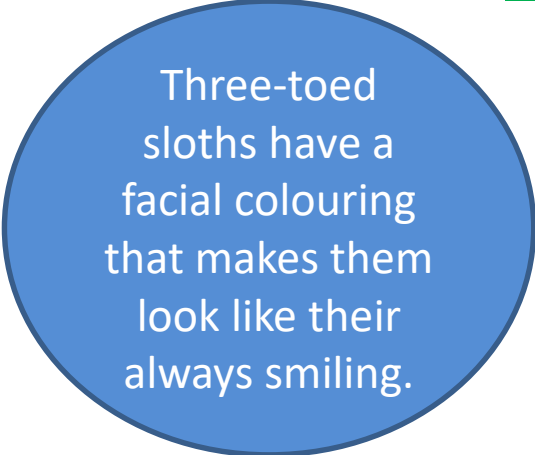

Diet

Sloths eat: Twigs, leaves, buds and greens. Since they don't have incisors they take a long time to eat it. They actually take weeks to digest things that other animals take hours to digest.

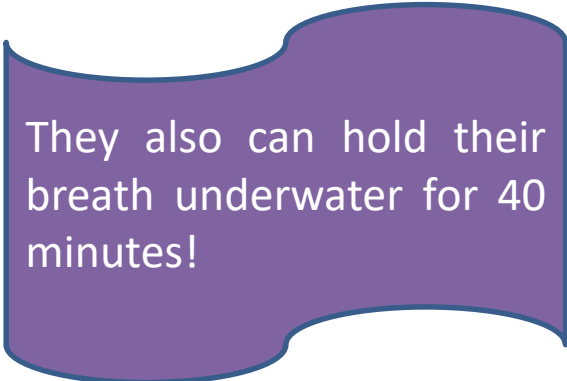

Movement

Sloths conserve energy by going slow. Sloths on the ground move 30cm per minute.

Two Amazing Facts

Three-toed sloths have a facial colouring that makes them look like their always smiling.

They also can hold their breath underwater for 40 minutes!
