

CHAPTER SIX:

MARS AND BEYOND

You did it! You created a habitat on Mars – the first ever settlement of human beings on an off-Earth planet. Now you need to let people back on Earth know what life on Mars is like and why they should be as excited about it as you are. Get ready to impress the Earthlings with your achievements...

WEEKEND ON MARS

In the future, we could see humans travelling all over the solar system for fun rather than science. Design a space tourism poster to bring Earthlings to Mars. This will be displayed in every country on Earth, so make sure it is appealing to everyone, everywhere.
