

# Our Science Principles

**S** Scientific vocabulary

Children communicate using the language of scientists.

**C** Child-led investigations

Children become resilient learners who develop and investigate their own questions.

**I** Interactive

Children experience lessons which involve hands-on activities with everyone involved.

**E** Enquiry types

Children understand and explore all 5 types of enquiry.

**N** Noticing

Children are keen observers, noticing science in the world around them.

**C** Curiosity

Children are curious and ask questions.

**E** Exploration

Children deepen their learning through further exploration at home.

At CJS, we believe everyone is a scientist. We ignite the children's curiosity, encouraging them to ask questions and explore the world they live in. We empower our pupils to take control of their science journey.
