

At its core, a mastery approach rejects the idea that some children simply ‘can’t do maths’.

Excellence in mathematics at CJS
Dan Breeze - Maths Lead

‘Our aim at CJS is to ensure that our children are confident mathematicians who are able to apply their mathematical knowledge and skills to all areas of the primary curriculum and to real life contexts’

What is 'teaching for mastery'?

NCETM
NATIONAL CENTRE FOR EXCELLENCE
IN THE TEACHING OF MATHEMATICS

Mastering maths means pupils acquiring a deep, long-term, secure and adaptable understanding of the subject.

For example, how should this be taught?

$$\frac{2}{3} \text{ of } 18 = ?$$

$$\frac{2}{3} \text{ of } 18 = ?$$

- Divide 18 by 3 (6)
- Multiply the result by 2
- The answer is 12

Teach by
method

This will get a correct
answer but there is little
understanding
of **why** the method
works.

$$\frac{2}{3} \text{ of } 18 = ?$$

Teach by
method

6 months later

I can't remember whether to divide by the two or the three to start. They both seem equally valid..

$$\frac{2}{3} \text{ of } 18 = ?$$

Teaching for mastery

What is a third?

Concrete

Pictorial

$$\frac{2}{3} \text{ of } 18 = 12$$

Abstract

Teaching for mastery uses concrete resources and pictures to develop a deep understanding before moving on to the abstract (known as the 'CPA Approach').

This is called the numerator. It represents how many equal parts we have ($2 \times 6 = 12$)

I have mastered these key concepts :

$$\frac{2}{3}$$

This is called the denominator. It represents how many equal parts the whole (18) is divided into.

A child who has achieved mastery should be able to thoroughly explain these concepts and accurately use key vocabulary.

$$\frac{2}{3} \text{ of } 18 = ?$$

Teach for
mastery

6 months later

I have mastered the concepts of numerators and denominators so I can work out the method if I've forgotten it.

At CJS, we strive for equity of opportunity for all our pupils.

How can I help my child
with their maths?

GOOD
NEWS

You don't have to be :

A professor of
mathematics

Someone who
loves the
subject.

Someone with loads of
time to spare every
week.

Top three ways to help your children with their maths :

Times tables

1X	2X	3X	4X	5X
1x1=1	2x1=2	3x1=3	4x1=4	5x1=5
1x2=2	2x2=4	3x2=6	4x2=8	5x2=10
1x3=3	2x3=6	3x3=9	4x3=12	5x3=15
1x4=4	2x4=8	3x4=12	4x4=16	5x4=20
1x5=5	2x5=10	3x5=15	4x5=20	5x5=25
1x6=6	2x6=12	3x6=18	4x6=24	5x6=30
1x7=7	2x7=14	3x7=21	4x7=28	5x7=35
1x8=8	2x8=16	3x8=24	4x8=32	5x8=40
1x9=9	2x9=18	3x9=27	4x9=36	5x9=45
1x10=10	2x10=20	3x10=30	4x10=40	5x10=50
1x11=11	2x11=22	3x11=33	4x11=44	5x11=55
1x12=12	2x12=24	3x12=36	4x12=48	5x12=60

6X	7X	8X	9X	10X
6x1=6	7x1=7	8x1=8	9x1=9	10x1=10
6x2=12	7x2=14	8x2=16	9x2=18	10x2=20
6x3=18	7x3=21	8x3=24	9x3=27	10x3=30
6x4=24	7x4=28	8x4=32	9x4=36	10x4=40
6x5=30	7x5=35	8x5=40	9x5=45	10x5=50
6x6=36	7x6=42	8x6=48	9x6=54	10x6=60
6x7=42	7x7=49	8x7=56	9x7=63	10x7=70
6x8=48	7x8=56	8x8=64	9x8=72	10x8=80
6x9=54	7x9=63	8x9=72	9x9=81	10x9=90
6x10=60	7x10=70	8x10=80	9x10=90	10x10=100
6x11=66	7x11=77	8x11=88	9x11=99	10x11=110
6x12=72	7x12=84	8x12=96	9x12=108	10x12=120

Telling the time and using it in everyday contexts

Being positive about the subject.

If your child reaches Year 6 knowing these things, they have a great platform to build on :

Times tables

Number bonds to
20

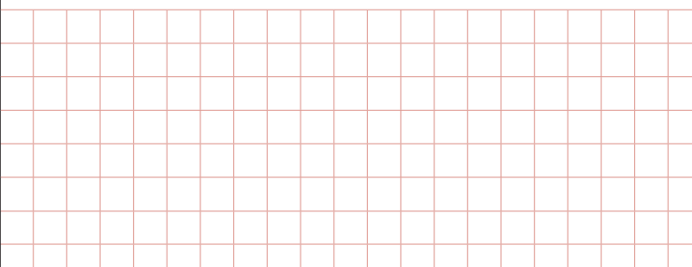

Place Value

Formal methods
with the four
operations

Basic fluency in
fractions

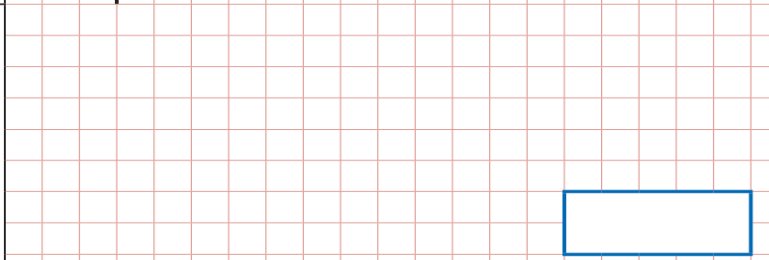

Formal methods with the four operations

Here are examples of end of
Year 6 SATs test questions
that require these key skills.

2	<input type="text"/> = 8,275 + 82	<input type="text"/> 1 mark
		

13	1,210 ÷ 11 =	<input type="text"/> 1 mark
		

23	$\begin{array}{r} 836 \\ \times 27 \\ \hline \end{array}$	<input type="text"/> 2 marks
	Show your method 	

25	$37 \overline{) 888}$	<input type="text"/> 2 marks
	Show your method 	

Basic fluency in fractions

Here is an example of an end of Year 6 SATs test question that requires these key skills.

27	35% of 320 = 	<input data-bbox="1663 1082 1753 1168" type="text"/> 1 mark
