

May 2023

Dear Parent/Carer

STEM WEEK

On Tuesday 6 June - Friday 9 June 2023 we will be celebrating **S.T.E.M.** week. This is an opportunity for children to explore the fascinating role that Science, Technology, Engineering & Maths play in the world around us.

We are really looking forward to a week filled with engaging, stimulating project-based activities under the theme of 'connections.' This will incorporate all subjects across the curriculum with a focus on Science, Technology and Mathematics.

In addition to this, we will be holding a S.T.E.M. fair where children will have the opportunity to showcase their in-class learning and S.T.E.M. projects they have created at home. As such, we are inviting children and families to explore a S.T.E.M. based project at home and bring this in to display at the fair to the whole school. Each class will be provided with a range of suggested activities to do at home and bring in – however, families are welcome to choose a topic, experiment or idea of their own choice!

This opportunity to visit school will take place on Friday 9 June, at the following times:-

Year 3 and 6 - 9.45am – 10.30am

Year 4 and 5 - 2.15pm – 3pm

Please contact your child's teacher if you work in the STEM industry and you will be willing to come in to class or assembly and share your experiences with the children.

Yours sincerely

Mrs Landrebe
Science Coordinator

Dan Breeze
Maths Coordinator

Abbi Arnold
DT coordinator
